Short description:

allows brewing coffee on the go - place on top of a mug, put disposable filter and coffee inside, pour hot water

Description:

Pretty useful for brewing real coffee in a hotel room that provides a water heater and instant coffee, while camping, or even at home if you only need a cup. The photo with the filter shows an older version with holes in the sides; the side holes proved useless in practice, made for huge render / slice times and slowed down printing, so they're gone from the latest design.

If you can, please use the online documentation found at <http://www.youmagine.com/designs/coffee-filter-holder> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
